

Supporting Home Learning

The curriculum we deliver has been adapted for our flexi-school provision, our core days (Tuesday, Wednesday, Thursday) are crammed with curriculum learning and additional curriculum breadth experiences. However, it is an impossible feat to fit everything into three days that we would normally cover in five! Here you will find maths and English learning intentions and some useful resources. Each class produces a termly overview which details the learning for each half term in all subject areas. Class teachers are always happy to discuss the curriculum with parents and carers and are happy to help provide suggestions and support for home learning.

If you would like any further information regarding your home learning days, please feel free to contact your class teacher who can advise you on what to cover. Do remember though, these are days that you have made a commitment to teach your child, the school will support you, but will not be making provision for these days.

There are many websites to support home learning across the whole curriculum. Here are few that come recommended by parents and educators that you may find useful.

- [Oak Academy](#) This website has lesson ideas and plans that link to the whole curriculum, you can find well resourced learning throughout.
- [Oxford Owl Library](#) The virtual library is stocked with books for primary school children of all reading levels, including books from reading schemes like Biff and Chip and Read Write Inc Phonics. There are also books for independent reading.
- [Demystifying Primary School Jargon!](#) One of the trickiest things about supporting your child's home learning - whether you're helping with homework or facing school closures again - is making sense of what they're learning at school. Many of the terms they use are unfamiliar (fronted adverbials, anyone?), which is where TheSchoolRun comes in.
- [The Book Trust - Home time fun](#) Looking for something fun as a family? Enjoy storytime with our free online books and videos, play games, win prizes, test your knowledge in our book-themed quizzes, or even learn how to draw some of your favourite characters. Stories are updated daily.
- [Daily Lessons](#) BBC Bitesize has a huge range of online lessons in English and maths, tailored to your child's key stage. You can use these to

supplement what your child is learning at school, or to keep them learning if they're off school for any reason.

- [Online Games](#) Children learn best if they're enjoying themselves, which is why we love Topmarks: a website full of fantastic maths games for children aged three to 14.
- [ICT skills - coding](#) Blockly Games introduces children to the basics of computer coding through interactive games.
- [Learning and Playing - Make Time to Play](#) Learning isn't all about sitting at the table with pencil and paper; there's a lot that kids can learn through play, too.
- [Safe Search Engine](#) Keeping kids safe online is a priority for every parent, especially as a few wrong clicks could lead them to seriously unsuitable content.
